

INNOVATION IN REDESIGN OF EUROPEAN CITIES

European Forum for Architectural Policies Conference
within the framework of Polish Presidency of the EU Council

Gdańsk, September 18-20. 2011

Organized by: Ministry of Infrastructure, Chamber of Architects of the Republic of Poland IARP, Association of Polish Architects SARP, European Forum for Architectural Policies EFAP

Participants: representatives of central and municipal authorities, culture and education, Non-Governmental Organizations; professional bodies in the field of architecture, urban design and planning, students, the media

Goals:

- to indicate an innovative role of architecture in redesign of European cities that is aimed at their development and increase of attractiveness, while challenged by global competition
- to indicate an innovative role of architecture and urban design in sustainability and harmony of urban environment, while responding to the *Europe 2020 Strategy for smart, sustainable and inclusive growth*
- to indicate an innovative role of architecture that aims at the life quality, as opposed to short-term and territory-limited profits of mostly financial character, observed at all levels: national and regional, municipal, corporate and individual
- to indicate a need for cooperation of the state and local authorities, the NGOs, research institutes and profession in support of innovative architecture
- to indicate the needed actions, carried by EU and governmental bodies in processing the redesign of European cities' structure
- to indicate the priorities of the Architectural Policy, accepted by all parties engaged in innovativeness and architectural quality, aimed at sustainable development of Poland
